#201 Wonderful World of Agribusiness
Learn where your food begins and ends. Try your hand at things like trading commodities, creating a marketing plan, and drawing the food chain.

#403 Of Pigs and People *
See what your brain has in common with one of the favorite farm animals. Test your knowledge by examining real piglet brains and watch a demonstration of how we use pigs to study neurosciences.

#601 The Honey Bee – Our Hardworking Friend! *
(in conjunction with U of I Extension)
Did you know that the University of Illinois Pollinatarium is the first free-standing science center in the nation devoted to flowering plants and their pollinators! This session will begin with you exploring the outdoors as you collect and identify insects and prairie plants native to this area. You will also learn about bees and the critical role they play in food production. Bees are responsible for pollinating many of our specialty crops and help us maintain a good food supply. We will finish our session inside the Pollinatarium as you get a hands-on look at a working honey bee hive and enjoy tasting the honey the bees make!

#603 Lesions, Cankers, and Rots! Oh My!
Did you know plants get diseases? Tour the University of Illinois Plant Clinic and learn about plant pathogens. Participate in hands-on activities in our lab and meet our favorite fungi, bacteria, and nematodes.

#701 Food Challenge *
Do you like to eat food? Do you like to cook food? Do you like to win prizes? Sound like you? Join the 4-H Food Challenge! You will learn about food nutrition, safety, and preparation all while working together as a team to create a dish in 30 minutes using mystery ingredients. The session will end with teams presenting their finished dish to a panel of judges who will evaluate and provide insightful feedback.
#801 Africa Jam: Drum for Emotional and Social Well Being *
Join a drum circle and learn simple rhythms on the djembe drums! Learn about the Department of Human Development and Family Studies' perspective on the inter-relationship of physical activity, emotional well-being, and social competency, especially in children and teens. We will discover how these all work together as we drum in harmony.

#901 Bird's the Word: Exploring Avian Ecology and Conservation
Learn about the natural history of birds and research techniques used to protect wild bird populations in this workshop set outside! Get an up-close and personal look at wild birds with mist netting and banding demonstrations.

#1001 Fun with LEGO Mindstorms Robots! *
Learn hands-on with LEGOos and make your own robot! Learn how to program LEGO Mindstorms robots and work with the robots to complete different challenges. Program your robot to pick up a cow and avoid obstacles in its path. If you like LEGOos or robots, you don’t want to miss the fun! No previous experience necessary!
