

Session 1
Thursday, July 13
10:00 – 11:30 am

#303 Man's Best Friend *

Come learn all about man's best friend. You will spend time learning about dog behavior, training tips, and humane education.

#305 The Secrets of Sausage *

Explore the yummy herbs and spices that make sausage so delicious. You will make your own secret recipe and compete against the class to determine who is the best sausage maker.

#306 Behind the Scenes in Pet Food *

Join us for a look into what we feed our pets. Learn about what to buy and how to buy your pet food. We will also make our very own dog treats!

#601 Your Nose Talks to Your Tongue (and They Are Not the Same)

This hands-on (or "tongue-on") presentation will introduce the field of flavor perception. Demonstrations and tasting activities will not only be fun to do but will increase awareness of how we all live in our own sensory worlds.

#701 From Virtual Reality to Chutes and Ladders – Video Games vs. Board Games: How We Learn Through Play

Fun for gaming novices and experts alike! Play video games and board games while being tested for skills and learning. We'll compare and discuss advantages of both types of games for cognitive learning, motor skills, social skills, and more.

#901 Fun with LEGO Mindstorms Robots! *

Learn how to program LEGO Mindstorms robots and work with them to complete different challenges. Program your robot to pick up various objects and avoid obstacles in its path. No previous experience is necessary.

#903 Being Mindful in a Busy World for Kids *

Mindfulness is simply noticing what is happening right now. Learn ways to improve your focus, increase your awareness, and slow down and enjoy life!

#905 Family Fishing Offers More than Dinner

Spending time together in nature fishing is a great way to keep connected as a family and to get connected to nature. Experience the benefits of fishing!
